

Kaş Marina - Antalya, Turkey

On your route in Blue Heaven

MAKYOL

A new marina at the heart of Turkish Riviera

Kaş: A town of craggy shores and crystal-clear waters

The small picturesque town of Kaş with its small harbor surrounded by green hills and the steep rocky walls of the Taurus mountains is located on the historically important Lycian coast that stretches from Fethiye to Antalya in what is one of the most beautiful parts of the Turkish Mediterranean.

The Lycians were among the most ancient of indigenous Anatolian people and many signs remain in and around Kaş that tell us about their magnificent past.

Kaş is quite popular among international scuba divers and it is located very conveniently for those who enjoy sailing among Turkish coves and Greek islands.

A marina with 400+ slips

Kaş is easily accessible from both Antalya and Dalaman airports. The marina will have more than 400 slips for berthing every size of vessels including mega-yachts. Water, pump-out, power, and internet access will be available at each berth. There will also be a large dry-docking facility and bunkering services.

Construction of the marina is currently in progress. The quay walls have been built and land reclamation work has been completed. Piers and buildings are under way.

Everything you would like to see in a marina

Kaş Marina will have every service that may be required by our guests from basic marina facilities to shopping areas, dry-docking and maintenance, sports and accommodations.

Arriving at Kaş Marina you will find yourself in an environment that is as comfortable and enjoyable as it is stylish.

Saint Nicholas and seafarers

Saint Nicholas (or Santa Claus as he is commonly known) lived in the town of Myra in Kaş.

He was the patron saint of sailors and travelers and reputedly saved many of them caught in heavy storms through his prayers and intervention.

Owned and operated by Makyol

Kaş Marina is owned by Makyol Construction Company, a well-known and major Turkish contractor with a high international reputation.

In addition to its portfolio of heavy construction contracts in many countries, Makyol is also actively involved in energy, tourism, real estate and port and marina development.
